GO CC GSEA ranked by stat
collagen trimer
external side of plasma membrane
extracellular matrix
external encapsulating structure
MHC protein complex
symbiont cell surface
other organism part
MHC class I peptide loading complex
complex of collagen trimers
NADPH oxidase complex
basement membrane
integrin complex
protein complex involved in cell adhesion
receptor complex
side of membrane
cell-substrate junction
focal adhesion
plasma membrane signaling receptor complex
phagocytic vesicle
plasma membrane protein complex
Activated in ID
mitochondrial matrix
coated vesicle
endoplasmic reticulum-Golgi intermediate compartment
exocytic vesicle membrane
synaptic vesicle membrane
transport vesicle membrane
mitochondrial large ribosomal subunit
organellar large ribosomal subunit
organelle inner membrane
mitochondrial inner membrane
coated vesicle membrane
proteasome regulatory particle
proteasome complex
mitochondrial ribosome
organellar ribosome
mitochondrial protein-containing complex
respiratory chain complex
phagophore assembly site
respiratory chain complex I
NADH dehydrogenase complex
Suppressed in ID
