GO CC GSEA ranked by logFC
collagen trimer
MHC protein complex
external side of plasma membrane
NADPH oxidase complex
MHC class I peptide loading complex
symbiont cell surface
complex of collagen trimers
other organism part
side of membrane
lumenal side of endoplasmic reticulum membrane
integrin complex
phagocytic vesicle
protein complex involved in cell adhesion
plasma membrane protein complex
cell-substrate junction
focal adhesion
receptor complex
extracellular matrix
external encapsulating structure
actin cytoskeleton
Activated in ID
intermediate filament
respiratory chain complex
respiratory chain complex I
NADH dehydrogenase complex
high-density lipoprotein particle
lipoprotein particle
plasma lipoprotein particle
protein-lipid complex
Suppressed in ID
