MSigDB Hallmark GSEA ranked by stat
Inflammatory response
Interferon gamma response
Interferon alpha response
Epithelial mesenchymal transition
Allograft rejection
Apical junction
Il6 jak stat3 signaling
Kras signaling up
Coagulation
Complement
Hedgehog signaling
Wnt beta catenin signaling
G2m checkpoint
Mitotic spindle
Apical surface
Il2 stat5 signaling
Angiogenesis
Tnfa signaling via nfkb
Myogenesis
Notch signaling
Activated in ID
P53 pathway
Estrogen response late
Glycolysis
Reactive oxygen species pathway
Hypoxia
Myc targets v1
Apoptosis
Bile acid metabolism
Tgf beta signaling
Unfolded protein response
Xenobiotic metabolism
Fatty acid metabolism
Uv response up
Heme metabolism
Peroxisome
Androgen response
Pi3k akt mtor signaling
Protein secretion
Mtorc1 signaling
Oxidative phosphorylation
Suppressed in ID
